

Product Information: Geartech EP 90

Description

Geartech EP 90 is a high quality gear lubricant, formulated using high quality, virgin, mineral base stocks which incorporate an advanced additive system. The lubricant displays excellent extreme pressure and anti-wear performance as well as offering outstanding protection against rust and corrosion. Geartech EP 90 is formulated to deliver excellent foam control, is thermally stable and highly resistant to oxidation

Applications

Geartech EP 90 is recommended for the lubrication hypoid and spiral bevel gear systems, where the original equipment manufacturer recommends a lubricant of this quality, performance level and viscosity. It may also be used to lubricate spur and helical gears where the original equipment manufacturer recommends an API GL-4 lubricant.

Performance Features

- Extreme pressure properties
- Excellent anti-wear performance
- Thermally stable
- Resistant to oxidation
- Excellent foam control
- Protection against rust and corrosion

Performance Level

API GL-4

Typical Data

Characteristic	Unit	Result
Density @ 15.6°C	kg/l	0.896
Kinematic Viscosity @ 40°C	cSt	175
Kinematic Viscosity @ 100°C	cSt	16.5
Viscosity Index		98
Flashpoint (Closed)	°C	200
Pour Point	°C	-18
